## 1 The last class

1. Talk about the end sem : Try to understand the different numerical techniques for doing computations. You should be able to do them by hand. Also try to find your own ideas about how to do them.
2. Do some recalling of all the methods done in class
  1. Interpolation
  2. Differentiation
  3. Integration
  4. Monte Carlo techniques
  5. Finding area
3. Make it clear that calculators are allowed
